You can generally identify forward-looking statements by the use of forward-looking terminology such as "anticipate," "believe," "continue," "could," "estimate," "expect," "explore," "evaluate," "intend," "may," "might," "plan," "potential," "predict," "project," "seek," "should," or "will," or the negative thereof or other variations thereon or comparable terminology. These forward-looking statements are based on each of the companies' current plans, objectives, estimates, expectations and intentions and inherently involve significant risks and uncertainties, many of which are beyond Jazz Pharmaceuticals' or GW Pharmaceuticals' control. Actual results and the timing of events could differ materially from those anticipated in such forward-looking statements as a result of these risks and uncertainties, which include, without limitation, risks and uncertainties associated with: Jazz Pharmaceuticals' and GW Pharmaceuticals' ability to complete the acquisition on the proposed terms or on the anticipated timeline, or at all, including risks and uncertainties related to securing the necessary regulatory and shareholder approvals, the sanction of the High Court of Justice of England and Wales and satisfaction of other closing conditions to consummate the acquisition; the occurrence of any event, change or other circumstance that could give rise to the termination of the definitive transaction agreement relating to the proposed transaction; risks related to diverting the attention of GW Pharmaceuticals and Jazz Pharmaceuticals management from ongoing business operations; failure to realize the expected benefits of the acquisition; significant transaction costs and/or unknown or inestimable liabilities; the risk of shareholder litigation in connection with the proposed transaction, including resulting expense or delay; the risk that GW Pharmaceuticals' business will not be integrated successfully or that such integration may be more difficult, time-consuming or costly than expected; Jazz Pharmaceuticals' ability to obtain the expected financing to consummate the acquisition; risks related to future opportunities and plans for the combined company, including the uncertainty of expected future regulatory filings, financial performance and results of the combined company following completion of the acquisition; GW Pharmaceuticals' dependence on the successful commercialization of Epidiolex/Epidyolex and the uncertain market potential of Epidiolex; pharmaceutical product development and the uncertainty of clinical success; the regulatory approval process, including the risks that GW Pharmaceuticals may be unable to submit anticipated regulatory filings on the timeframe anticipated, or at all, or that GW Pharmaceuticals may be unable to obtain regulatory approvals of any of its product candidates, including nabiximols and Epidiolex for additional indications, in a timely manner or at all; disruption from the proposed acquisition, making it more difficult to conduct business as usual or maintain relationships with customers, employees or suppliers; effects relating to the announcement of the acquisition or any further announcements or the consummation of the acquisition on the market price of Jazz Pharmaceuticals' ordinary shares or GW Pharmaceuticals' American depositary shares or ordinary shares; the possibility that, if Jazz Pharmaceuticals does not achieve the perceived benefits of the acquisition as rapidly or to the extent anticipated by financial analysts or

Conference call today at 8:30 AM ET

DUBLIN and LONDON, February 3, 2021 – Jazz Pharmaceuticals plc (Nasdaq: JAZZ) and GW Pharmaceuticals plc (Nasdaq: GWPH) today announced the companies have entered into a definitive agreement for Jazz to acquire GW for \$220.00 per American Depositary Share (ADS), in the form of \$200.00 in cash and \$20.00 in Jazz ordinary shares, for a total consideration of \$7.2 billion, or \$6.7 billion net of GW cash. The transaction, which has been unanimously approved by the Boards of Directors of both companies, is expected to close in the second quarter of 2021.

Upon close of the transaction, the combined company will be a leader in neuroscience with a global commercial and operational footprint well positioned to maximize the value of its diversified portfolio.

GW is a global leader in discovering, developing, manufacturing and commercializing novel, regulatory approved therapeutics from its proprietary cannabinoid product platform to address a broad range of diseases. The company's lead product, Epidiolex® (cannabidiol) oral solution, is approved in patients one-year and older for the treatment of seizures associated with Lennox-Gastaut Syndrome (LGS), Dravet Syndrome and Tuberous Sclerosis Complex (TSC), all of which are rare diseases characterized by severe early-onset epilepsy. *Epidiolex* was the first plant-derived cannabinoid medicine ever approved by the U.S. Food and Drug Administration (FDA). This product has also been approved, under the tradename Epidyolex®, by the European Medicines Agency (EMA) in patients two years of age and older for the adjunctive treatment of seizures associated with LGS and Dravet syndrome in conjunction with clobazam and is under EMA review for the treatment of seizures associated with TSC. In addition to the approved indications for *Epidiolex*, there are considerable opportunities to pursue other indications within the epilepsy field, including other treatment-resistant epilepsies where significant unmet needs of patients exist.

Beyond *Epidiolex*, GW has a scientific platform and deep innovative pipeline of cannabinoid product candidates, as well as highly specialized manufacturing expertise, developed over two decades of pioneering and building leadership in cannabinoid science. This pipeline includes nabiximols, for which the company is in Phase 3 trials to seek FDA approval for treatment of spasticity associated with multiple sclerosis and spinal cord injury, as well as earlier-stage cannabinoid product candidates for autism and schizophrenia.

“Jazz is proud of our leadership position in sleep medicines and rapidly growing oncology business. We are excited to add GW's industry-leading cannabinoid platform, innovative pipeline and products, which will strengthen and broaden our neuroscience portfolio, further diversify our revenue and drive sustainable, long-term value creation opportunities,” said Bruce Cozadd, chairman and CEO of Jazz Pharmaceuticals. “We are joining two teams that share a passion for, and track record of, developing differentiated therapies that advance science and transform the lives of patients. This will help facilitate a successful integration and bring added capabilities to Jazz. Given the strength of our balance sheet and the meaningful financial drivers of the transaction, we are confident in the value we can deliver to both companies' shareholders and patients. We look forward to welcoming the GW team to Jazz to build an even stronger company.”

“Over the last two decades, GW has built an unparalleled global leadership position in cannabinoid science, including the successful launch of Epidiolex, a breakthrough product within the field of epilepsy, and a diverse and robust neuroscience pipeline. We believe that Jazz is an ideal growth partner that is committed to supporting our commercial efforts, as well as ongoing clinical and research programs,” said Justin Gover, CEO of GW Pharmaceuticals. “We have a shared vision of developing and commercializing innovative medicines that address significant unmet needs in neuroscience and an approach of putting patients first. Together, we will have an opportunity to reach and impact more patients through a broader portfolio of neuroscience-focused therapies than ever before.”

Creates an Innovative, High-Growth, Global Biopharma Leader with Financial Strength

- **Adding a Third High-Growth Commercial Franchise:** The transaction enhances product diversification through the addition of a third high-growth commercial franchise for critical unmet patient needs within: 1) sleep disorders, 2) oncology, and 3) epilepsies. Specifically, the acquisition will expand Jazz’s growing neuroscience business by adding *Epidiolex*, a global, high-growth childhood-onset epilepsy franchise with near-term blockbuster potential.

GW has rapidly scaled *Epidiolex*, achieving approximately \$510 million in annual sales within two years of launch and broad access to date, with more than 97% of U.S. lives covered¹. *Epidiolex* addresses significant unmet needs in the field of epilepsy and offers the potential for a substantial improvement in outcomes for patients who were previously drug resistant. The combined company will create a neuroscience leader with a global franchise and complementary therapeutic expertise, to maximize the value of Xywav™ (calcium, magnesium, potassium, and sodium oxybates) oral solution, *Epidiolex*, and other neuroscience products.

- **Robust Combined Pipeline in Neuroscience and Oncology to Drive Sustainable Growth:** GW’s novel cannabinoid platform will expand and diversify Jazz’s growing neuroscience pipeline. The collective Jazz and GW teams will bring highly complementary expertise to a pro-forma pipeline of 19 clinical development programs across neuroscience and oncology, including in sleep, epilepsy, movement disorders, psychiatry, hematology and solid tumors. Following the close of the transaction, the combined portfolio will include highly differentiated assets addressing significant unmet patient needs, which, when combined with complementary commercial models, accelerates Jazz’s growth strategy.
- **Shared Culture and Exceptional Talent Will Advance Mission to Transform the Lives of Patients:** Jazz and GW are focused on developing life-changing medicines for people with serious diseases, often with limited or no treatment options. Jazz’s and GW’s global teams possess unique talents and expertise and have proven capability to develop and launch differentiated therapies to support often-overlooked patient populations. Both companies are guided by shared values that include integrity, collaboration, passion, innovation and pursuit of excellence, and have cultures where diversity, equity and inclusion are a priority. The transaction brings together two companies with a significant presence in the United Kingdom, which is expected to remain an important part of the combined enterprise.
- **Expected to Deliver Substantial Shareholder Value:** The combination is expected to provide accelerated double-digit top-line revenue growth and to be accretive in the first full year of combined operations and substantially accretive thereafter. Jazz’s strong cash flow profile provides the capability to rapidly deleverage to a target net leverage of less than 3.5x by the end of 2022.

Transaction Terms

Under the terms of the agreement, holders of GW ADSs, which each represent 12 GW ordinary shares, will be entitled to receive \$220.00 for each GW ADS, of which \$200.00 will be paid in cash and \$20.00 in Jazz ordinary shares. This represents a premium of approximately 50 percent over GW's closing stock price on February 2, 2021, of \$146.25 and 60 percent over GW's 30-day volume weighted average price of \$137.17.

The number of Jazz ordinary shares to be issued to the holders of GW ADSs will be based on the volume-weighted average price of Jazz's ordinary shares over a 15 trading day period preceding the closing date of the transaction, subject to limitations on the maximum and minimum number of Jazz ordinary shares issuable per GW ADS based on a price range of \$139.72 to \$170.76 per Jazz ordinary share. Holders of GW ordinary shares that are not in ADS form will be entitled to receive the foregoing consideration divided by 12 per ordinary share.

The cash portion of the transaction consideration is expected to be funded through a combination of cash on hand and debt financing. Jazz has obtained fully committed debt financing from BofA Securities and J.P. Morgan Securities LLC. The financing includes a meaningful portion of pre-payable debt, in line with Jazz's commitment to rapid deleveraging.

Closing Conditions

The transaction has been unanimously approved by the Boards of Directors of both companies, and is subject to the approval of GW shareholders, sanction by the High Court of Justice of England and Wales and other customary closing conditions, including regulatory approvals. Subject to the satisfaction or waiver of the closing conditions, the transaction is expected to close in the second quarter of 2021.
